U.S. Marine Corps Veteran | 1st Recon Bn (2000-2007) | MARSOC (2007-2013)

Professional Summary

IT professional and U.S. Marine Corps veteran currently completing a B.S. in Graphic Information Technology (Full-Stack Web Development) at Arizona State University (expected May 2027). Combines mission-critical operations, systems support, and user-focused problem solving with growing software development skills in Python, JavaScript/TypeScript, Git, GitHub, and web authoring. Seeking opportunities to contribute to technical teams while continuing to grow as a full-stack developer.

Technical Skills

- Systems and Support: Windows 10/11, Linux (CLI, basic administration), Active Directory/Entra ID, Microsoft 365, Exchange Online
- Networking: TCP/IP, DNS, DHCP, VPN, Wi-Fi troubleshooting
- Development: Python, C (coursework), JavaScript/TypeScript (coursework), PowerShell (basic)
- Tools: Git, GitHub, VS Code, Jupyter Notebook

Projects and Coursework

AASU Portfolio Repository (GitHub)

- Built and maintain a structured academic portfolio repository with term/course organization, templates, and repeatable workflows for version control and documentation.

Summer 2026 Notebook Workflow Standardization

- Standardized notebook kernel configuration across four course notebooks to ensure consistent Python environment behavior and reproducible execution.

The Odin Project (In Progress)

- Completing a structured web development curriculum with hands-on projects in HTML, CSS, JavaScript, and Git/GitHub workflows.

GIT-215 Web Authoring Labs (In Progress)

- Developing foundational web projects and assignments focused on semantic HTML, CSS styling, and web publishing practices.

Python Learning and Practice Notebooks

- Created and organized Jupyter notebooks covering core programming concepts including strings, lists, dictionaries, random/math modules, and problem-solving exercises.

Professional Experience

SAAB Inc. | Lead System Analyst | Camp Lejeune, NC | May 2024 - Present

- Operate MCTIS, the USMC training program of record, supporting exercises from squad-level lanes to regimental-level evaluations.
- Instrument 1,000+ Marines and 50+ vehicles with simulators and GPS sensors to capture high-fidelity positional and engagement data.
- Enable objective After-Action Reviews by correlating live actions with exercise injects to provide measurable readiness feedback.
- Deploy expeditionary and fixed-site MCTIS configurations in both garrison and austere environments.

Jacobs Technologies | IT Support Technician | Camp Lejeune, NC | Mar 2023 - Apr 2024

- Resolved L1/L2 tickets across Windows 10/11 and Microsoft 365 environments; performed imaging, deployments, and data migrations.
- Troubleshoot Active Directory accounts, mailbox permissions, VPN connectivity, and printers/MFPs.
- Authored knowledge base articles to reduce repeat incidents and improve resolution time.

Raytheon Blackbird Technologies | Technical Support Specialist | Camp Lejeune, NC | Sep 2019 - Mar 2023

- Installed and configured technical surveillance equipment and mobile devices supporting special operations users.
- Coordinated RMAs and vendor support while tracking software licensing and compliance.
- Trained users and produced quick-reference guides to reduce recurring support issues.

Certifications

CompTIA A+ (Feb 2023) | Network+ (Apr 2023) | Security+ (Jun 2023)

Education

Arizona State University - B.S. Graphic Information Technology (Full-Stack Web Development), Expected May 2027

Relevant coursework: Intro to IT, Web Authoring, Creative Thinking/Design Visualization, Digital Illustration/Publishing, Intro to Commercial Print

Additional training: The Odin Project (Web Development Curriculum), In Progress
