■ Experience

Saab Inc. — Lead System Analyst

Camp Lejeune, NC | May 2024 – Present

- Spearheaded end-to-end technical execution for 15+ major Marine Corps exercises — including the largest MCTIS event to date — by designing and deploying 15 fully integrated network architectures delivering zero-data-loss connectivity for 2,800+ Marines.
- Enabled the first-ever dual-unit MCCRE, powered real-time command analytics, and produced 3 comprehensive After-Action Reports used by the Regimental Colonel to refine TTPs and drive data-driven readiness decisions.
- Managed 4,000+ equipment items and created standardized pre-deployment checklists and network templates that reduced setup and troubleshooting time across multiple sites.
- Identified a critical WAN infrastructure flaw and led the centralization and relocation of the network backbone, significantly improving reliability across all Saab operations at Camp Lejeune.
- Authored repeatable SOPs and training frameworks that earned direct recognition from the Commanding General for operational impact and program credibility.

Jacobs Technologies — IT Support Technician

Camp Lejeune, NC | March 2023 – April 2024

- Led Tier 1–2 IT support for 300+ personnel, resolving 95% of tickets within SLA and reducing average resolution time by 30% through streamlined troubleshooting workflows.
- Managed full lifecycle of 150+ DoD-issued devices (laptops, radios, secure comms), ensuring 100% compliance with DISA STIGs, encryption standards, and audit accountability.
- Automated user provisioning and onboarding, cutting setup time from 4 hours to 45 minutes per user across Windows, macOS, SIPR, and NIPR environments.
- Trained and mentored users in IT best practices and cybersecurity hygiene, reducing repeat incidents by 40%.
- Collaborated with network and cyber defense teams to identify and mitigate vulnerabilities, supporting command-wide OPSEC and CMMC readiness.

Raytheon Blackbird Technologies — Technical Support Specialist

Camp Lejeune, NC | September 2019 – March 2023

- Provided frontline support for mission-critical surveillance and communications systems used by 3rd Marine Raider Battalion, achieving 95%+ operational readiness across 100+ tactical devices.
- Reduced system downtime by 35% by streamlining RMA coordination with OEMs and engineering teams for ruggedized surveillance gear, encrypted mobile devices, and edge-computing hardware.
- Maintained 100% software license compliance and audit readiness for classified SOF programs across COTS/GOTS applications on tactical networks.
- Developed hands-on training and quick-reference guides for 150+ Raiders and enablers, cutting repeat support requests by 50%.
- Served as the technical liaison between warfighters and Raytheon engineering, translating operator feedback into fielded system improvements.
